Subject: Brennan Farm Update

Hi Lisa and Ben.

(b) (5), (b) (7)(A)

He has mentioned several times to me a problem he has with his neighbor and I am not able to help him with it because it is a storm water issue, and not pollutants. From what I understand there is a tile to drain storm water from his field and it goes under the county road and outlets on the neighbor's property. The neighbor has blocked the tile and now Jerry has a large portion of his field that he can't use because it is flooded. They had attorneys and judges involved and the judge said that the neighbor can do what he did. Jerry said that the county put in the drainage 40 years ago and he didn't think the neighbor should have been able to block the flow. But anyway, he just wants the water off his property. I told him that he should contact the county and he said that they won't do anything about it. He asked for your phone numbers and I gave them to him this morning. I don't know if this is something that WDNR gets involved with, but if you could help him find someone who can, he would really appreciate it.

Thanks and I hope you have a Happy Thanksgiving.

-Joan
